

THE HIGHLAND RAILWAY SOCIETY

Highland Railway 4mm scale kits and components. May 2011

This list attempts to catalogue kits and components which are or have been available to modellers including those no longer available - which may appear on the second hand market. Only items specific to the HR or sufficiently similar to be useful to HR modellers are included.

While every attempt is made to ensure accuracy, readers are advised to check details with manufacturers before ordering. No attempt is made to comment on the quality of the kits or components or reliability of supply. Society members can ask for feedback and advice on HRSchat.

A list like this is never complete or up to date and we advise modellers to look on individual suppliers' websites and www.ukmodelshops.co.uk and www.clag.org.uk for new models and up to date availability. A separate list of contact details of suppliers is included on www.hrsoc.org.uk and those contact details are not repeated here. If you notice any errors or significant omissions, please contact us at trade@hrsoc.org.uk.

A note on Lochgorm Kits: *This range is being continually expanded and modellers are advised to check with Lochgorm Kits for new additions.*

A note on Falcon Brassworks – May 2011: *This range has recently been taken over by new owners and kits are in the process of being re-introduced please check with Falcon about the availability of individual kits. These kits have been available under the Falcon Brass and in most cases Jidenco brands. Successive owners have improved some of the range, a process the new owners will continue.*
